the element of power

Compact Firepacks

Over 50 years of pioneering leadership in designing and manufacturing Firepacks has made WB Firepacks one of the most respected names in the field. Located near Rotterdam, WB Firepacks has modern manufacturing facilities and a testlab combined to produce reliable Firepacks, designed for reliable performance and excellent trouble-free operation.

WB Firepacks continuously improves programs of efficiency and product innovation, which assures you of meeting or exceeding job specifications, fire protection regulations and standards, regardless of the Firepack application.

WB Firepacks designs and manufactures a wide range of Firepacks:

- Electric motor driven units
- Diesel engine driven units,
- Vertical turbine fire pumps,
- Horizontal split case fire pumps,
- End-suction fire pumps,
- Multistage fire pumps,
- Rotary gear fire pumps

WB Firepacks is synonymous to First Class Fire Protection.

Boosting the firewater and/or foam instantaneously to where and when it is needed at the required capacity and pressure.

WB Firepacks and controllers are manufactured by qualified personnel in modern facilities.

Ready for delivery

To satisfy all your needs of on time delivery of Firepacks or components; fire pumps, fire engines and accessories are kept in stock, ready for use as single items or as part of a WB Firepack.

In addition to relevant fire protection regulations, WB Firepacks operates in accordance with ISO 9001 standards.

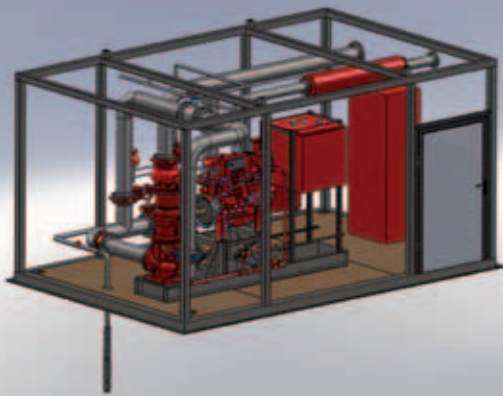

WB Firepacks and controllers are designed and manufactured in accordance with all relevant fire protection regulations and WB Firepacks standards.

WB Firepacks is specialized in the designing, testing and manufacturing of compact Firepacks, optimizing on installation time in the actual pump room and assuring trouble-free commissioning and operation.

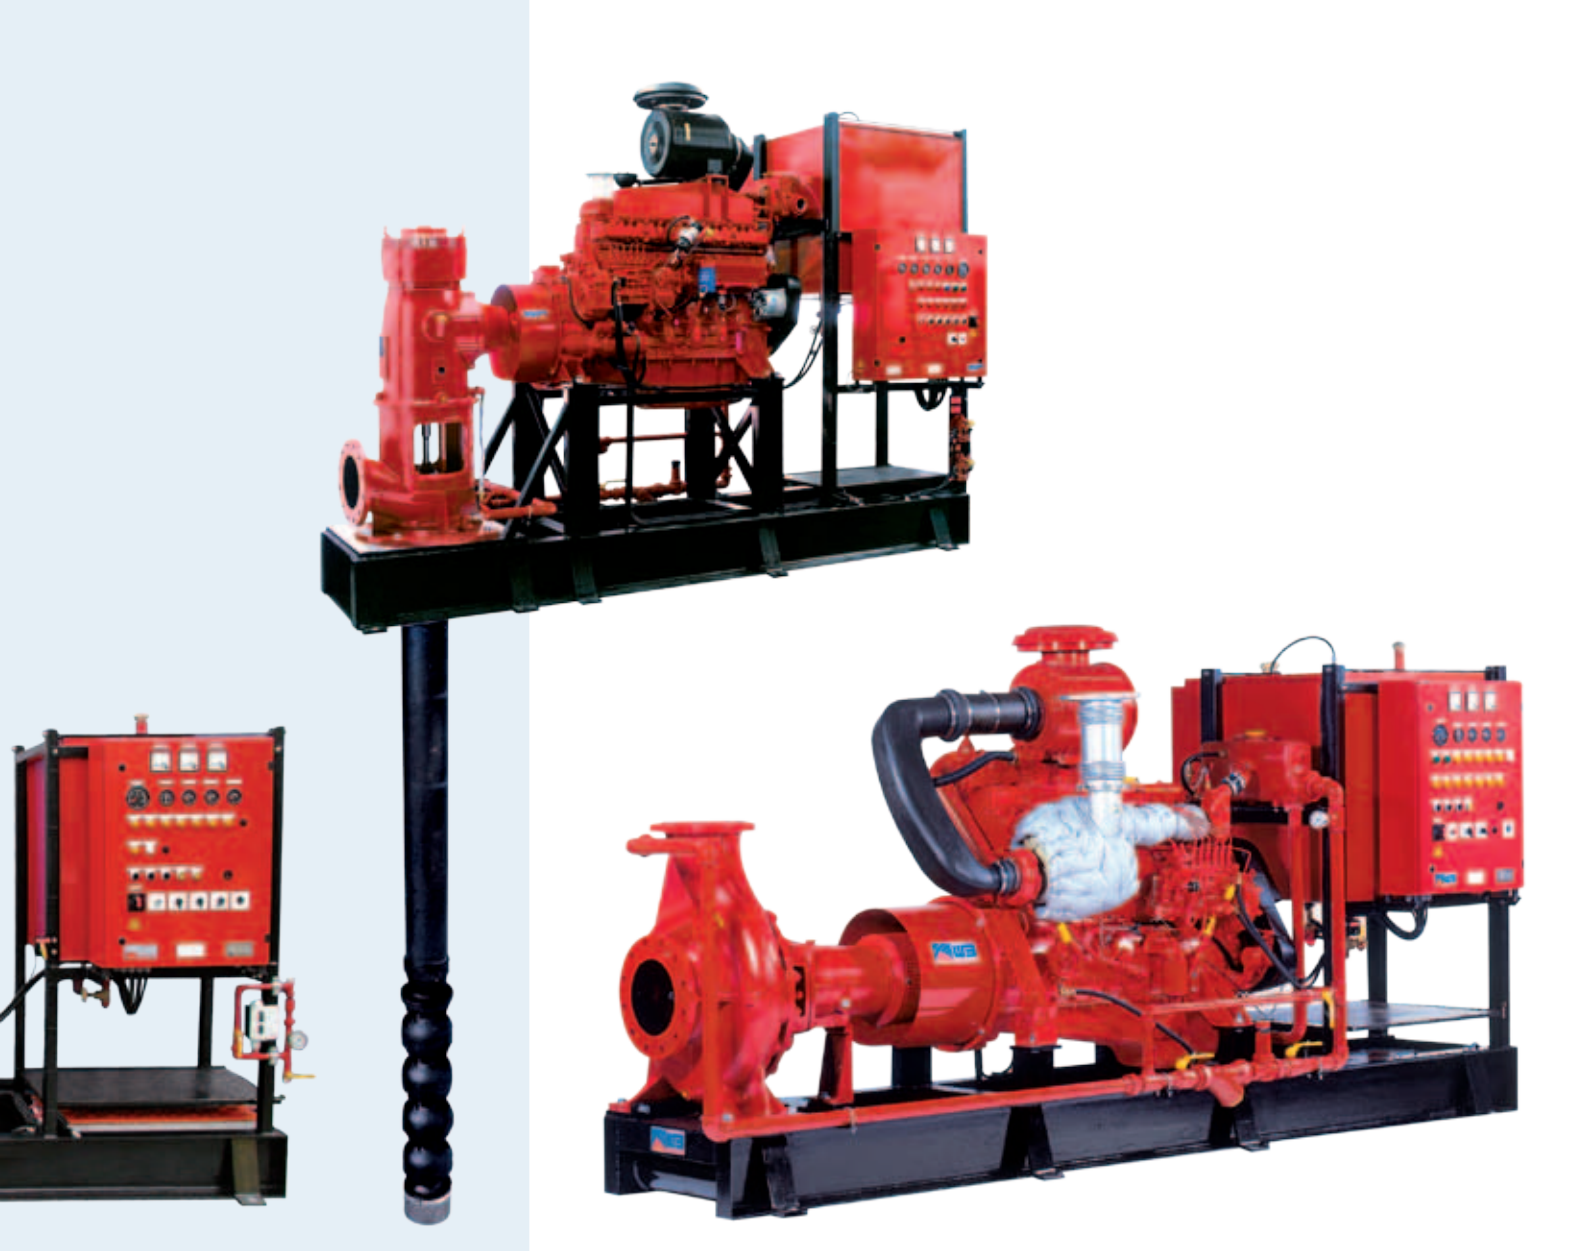

WB Firepacks is specialized in adapting industrial diesel engines, meeting or exceeding job specifications and fire protection regulations.

Over 10.000 companies in the world depend on
WB Firepacks 24 hours a day

Continuous design and development of
dedicated Firepack components and accessories assure you
reliable operation of the complete system

Testlab

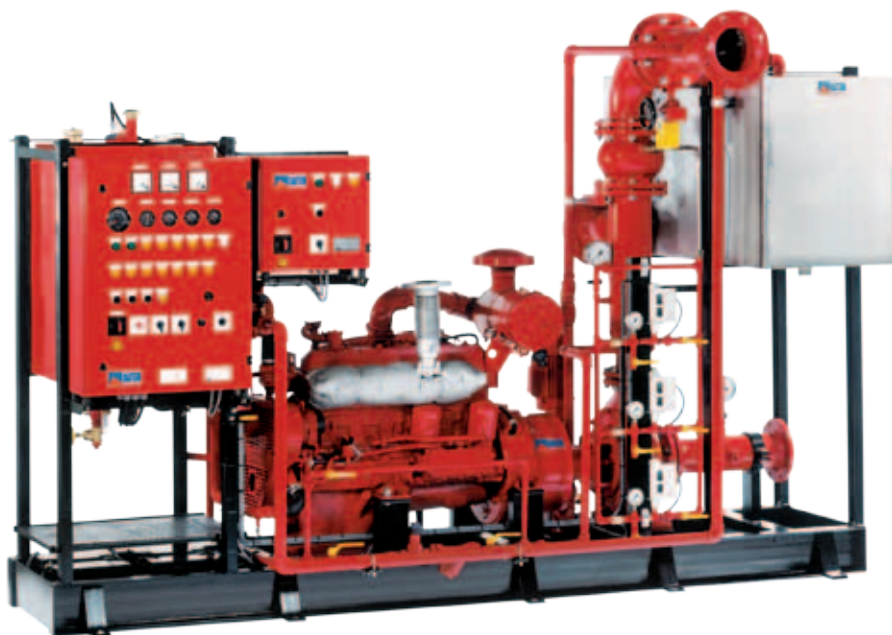

In addition to separate inspections and tests of the individual fire pumps, fire engines, fire controllers and dedicated accessories, the complete WB Firepacks are tested as complete units for full capacity and pressure in our own testlab, and if desired our and your customers can be present.

When reliability counts,
rely on the proven quality
of WB Firepacks

Seminars

“Saving lives and properties when under fire” is the true meaning of WB Firepacks’ efforts and activities in the total concept of fire fighting.

The objectives of the various seminars and training courses are best joined results and are organized at the premises of WB Firepacks. Also for your specific projects we can organize tailor-made seminars upon request.

Services

Regular maintenance of Firepacks by qualified personnel is a key factor in the proper functioning of the units when required.

A dedicated team of Firepack specialists is standby to assist you with:

- Training Services in the field
- Maintenance Services
- Trouble-shooting and repair
- On site modification activities
